Technical assessment	
Assessment criteria for scoring	Comments
Project expected immediate results (outputs) and mid-term results (outcomes) are clearly defined, measurable and achievable.	
Project activities are relevant, realistic and contribute to the desired results.	
Project has an exit-strategy that ensures the sustainability of the project.	
Project management and/or key persons are adequate for the desired outcomes.	
Applicant has previous experience of project management.	
Project beneficiaries and possible partners are clearly defined	
The budget is clear, reasonable and includes all the relevant items and is in line with the experience of the applicant.	
Project applies Human Rights Based Approach and takes at least some of the Cross-Cutting Objectives into consideration (checklist below).	
The project does not influence excessively to the local competition circumstances (<u>criterion applies to private sector applications</u>).	
The application form does not exceed the maximum length of 5 pages (+budget and CVs)	

Assessment of the Human Rights Based Approach (HRBA) and Cross-Cutting Objectives (CCOs)			
Issues	Yes	No	Comments
Has it been assured in the application that the project does not have negative effects on human rights or contribute to discriminatory structures, norms and practices?			
Does the application indicate the integration of the Human Rights principles (universality, equality / non-discrimination, participation / inclusion, and accountability and transparency) in planning, implementation and monitoring of the project?			
Does the project aim at strengthening Human Rights as part of the expected results?			
Have barriers for participation, inclusion and empowerment of rights- holders among project beneficiaries been taken in account in the project design?			
Has the gender equality and issues connected to it (including distribution of resources and power, gender roles, norms and values, participation in project activities and decision making, discrimination and gender based violence) been addressed in the project design?			
Does the project aim at strengthening capacities of the beneficiaries as a part of the expected results?			
Have groups in vulnerable situations been identified among the project beneficiaries?			
Does the application indicate any measures to mitigate the possible climate related risks?
