THE CITY OF ESPOO IN FINLAND HAS BEEN NAMED THE 2018 INTELLIGENT COMMUNITY OF THE YEAR

Kalasatama - Smart City Living Lab

- A model district of smart urban development
- Developed through experimenting, new technologies and the use of open data
- Collaboration between the city, companies, and the residents
- *Objective: 1 hour more time to life in every day*

"Just when you thought Scandinavia couldn't get any more eco-friendly, Helsinki ups the ante ... Heck, the design of Kalasatama is even set up to save residents a whole hour each day on conventional chores " (Inhabitat.com 2014)

HINKU FORUM, CARBON NEUTRAL MUNICIPALITIES OF FINLAND

HINKU brings together municipalities, businesses, citizens, and experts with the aim of reducing greenhouse gas emissions and creating carbon-neutral municipalities. Participating municipalities are committed to resource efficiency and plan to reduce CO2 emissions more rapidly than at European Union-mandated rates.
