

COP30 pre-event

Bridging knowledges for science with impact in the Amazon – Nordic-Brazilian dialogue towards and beyond COP-30

General goal

Unite the Nordic-Brazilian scientific community to promote more impactful research in the Amazon through responsible and inclusive cooperation and co-creation between diverse research areas and local stakeholders.

Objectives

- Promote scientific partnerships between researchers and research institutions from Brazil, Nordic countries, and Indigenous Peoples, Quilombolas, and Traditional Communities (PIQCTs) with a focus on the co-creation of transdisciplinary knowledge;
- Promote respectful research practices and partnerships and the appreciation of scientific knowledge beyond academia;
- Align joint strategic objectives between the areas of climate science, biodiversity, sustainable development, and the management and availability of data from the Amazon region;
- Develop and share strategies and best practices to enhance the impact of scientific results on public policies and sustainable business;
- Promote an ongoing Nordic-Brazilian dialogue on research collaboration and funding and establish potential joint pathways to effectively engage the Brazilian and Nordic scientific communities.
